

HEAVY LIFT CYLINDERS

RGG and RDG Series

Single and double acting, high pressure cylinders

HIGH TONNAGE CYLINDERS

ENGINEERED FOR TOUGH APPLICATIONS

SPX FLOW™ brand Power Team™ specializes in high-pressure hydraulic technology. Through a broad range of leading-edge component parts, accessories and tools, Power Team enables the creation and upkeep of concentrated force delivery solutions that can meet any application criteria.

RGG Series is perfect for any bridge construction application.

Power Team's new range of cylinders has been designed for safety and reliability by incorporating the following design elements.

Overview

- **The patented self-aligning piston gland** design minimizes the effects of offset load conditions.
- **The patented deep swivel cap** provides concentrated load centering up to 5°
- **The Power-Tech nitrocarburization treatment** inhibits corrosion and provides durability in harsh applications
- **The robust retaining ring** provides full load end stop.

Safety. Durability. Power Team.

A CLOSER LOOK AT THE TECHNOLOGY

Swivel Cap Minimizes Side Load Contidions

Sealband Technology Reduces Wear and Provides Lubricity

Design Complies With ASME/ ANSI B30.1 Safety Standard

Heavy Duty, Heat Treated Piston Rod for the Most Demanding Applications

High Pressure 3/8" NPTF Coupler

Robust Retaining Ring Withstands Full Load End Stop

Threaded Eyelets for 55-200T (Carry Straps Provided for 250-600T Cylinders)

Power-Tech Surface Treatment Provides Extended Durability

Self Aligning Piston Gland Design Resists Side Loading

RGG SERIES

Model shown: RGG552

Single Acting, load return cylinders Tonnage Range: 55–200

- **Patented swivel cap** provides concentrated load centering up to 5 degrees
- **Sealing technology** provides rod lubrication to reduce friction and wear
- **Optimized piston gland design** resists side loading conditions
- **Robust retaining ring** withstands full load end stop and conforms with ANSI B30.1 standards
- **Power-Tech nitrocarburization surface treatment** inhibits corrosion and provides exceptional durability

NOTICE: When selecting a hydraulic cylinder(s) capacity and stroke, Power Team recommends that you size to 80% of the maximum rated capacity and stroke for the application — known as the “80% Rule”. This will ensure additional safety factor and extend the product performance over time.

RDG SERIES

Model shown: RDG556

Double Acting, Hydraulic Return Tonnage Range: 55–200

- **Patented swivel cap** provides concentrated load centering up to 5 degrees
- **Sealing technology** provides rod lubrication to reduce friction and wear
- **Optimized piston gland design** resists side loading conditions
- **Robust retaining ring** withstands full load end stop and conforms with ANSI B30.1 standards
- **Power-Tech nitrocarburization surface treatment** inhibits corrosion and provides exceptional durability
- **Safety relief valve** prevents over-pressurization of the retract circuit

NOTICE: When selecting a hydraulic cylinder(s) capacity and stroke, Power Team recommends that you size to 80% of the maximum rated capacity and stroke for the application — known as the “80% Rule”. This will ensure additional safety factor and extend the product performance over time.

RDG SERIES

Models shown: RDG2502, RDG6004

Single Acting, load return cylinders Tonnage Range: 250-600

- **Patented swivel cap** provides concentrated load centering up to 5 degrees
- **Sealing technology** provides rod lubrication to reduce friction and wear
- **Optimized piston gland design** resists side loading conditions
- **Robust retaining ring** withstands full load end stop and conforms with ANSI B30.1 standards
- **Power-Tech nitrocarburization surface treatment** inhibits corrosion and provides exceptional durability
- **Safety relief valve** prevents over-pressurization of the retract circuit

NOTICE: When selecting a hydraulic cylinder(s) capacity and stroke, Power Team recommends that you size to 80% of the maximum rated capacity and stroke for the application — known as the “80% Rule”. This will ensure additional safety factor and extend the product performance over time.
