

UPGRADE TO D4 SERIES MIX PROOF VALVES

REPLACE YOUR EXISTING DA3+ VALVE INSERT AND ENJOY THE LATEST TECHNOLOGY

By leaving the existing valve housing in place, you can upgrade the valve insert and enjoy the increased productivity and reliability of the brand new D4 series mix proof valves, and save money. **Swap overs are typically completed in less than 5 minutes!**

WHY UPGRADE YOUR DA3+ VALVE INSERT ?

- Mechanical swap-over in less than five minutes
- Future proof your installed base
- Avoid cost and risks associated with the replacement of valve housings

ENJOY THE BENEFITS OF THE DA4 VALVE WITHOUT COMPLETE REPLACEMENT

- Open yoke design prevents heat transfer and provides visual leak detection
- 3-A compliant design
- Full enclosed actuator to prevent washdown fluid ingress
- Control units with integrated position detection, eliminating external cables
- Extended seal life through improved design and materials

RETAIN BENEFITS OF YOUR TRUSTED DA3+ TECHNOLOGY

- Light weight (weighs 40% less than competitor on average)
- Common seal kit across valve sizes minimizes inventory
- Cavity spray cleaning and integrated shaft seal and balancer flushing
