Goulds Pumps Redefines Chemical Process Coverage with New ICi Pump Featuring 54 Size Varieties

Adding 20 new sizes, the ICi expands application coverage and enables more precise pump selection

SENECA FALLS, N.Y. (July 22, 2026) – [Goulds Pumps](#), an ITT, Inc. (NYSE: [ITT](#)) company, welcomes a new addition to its isochemical (IC) portfolio with the launch of the Goulds ICi Chemical Process Pump. Engineered to provide expanded hydraulic coverage, greater configuration flexibility and enhanced durability, the Goulds ICi pump will help customers more precisely match pump performance to their process conditions.

Explore the new pump in detail here: <https://www.info.spxflow.com/goulds-ici-chemical-process-pump>

“Operators today need solutions that perform consistently across increasingly complex processes,” said Richard Evans, Global Product Manager at Goulds Pumps. “Our customer applications aren’t one-size-fits-all, and with the new Goulds ICi, now their pump portfolio isn’t either.”

What makes the Goulds ICi Pump stand out:

- 54 pump size varieties, which is 20 more than the existing Goulds IC pump range
- Hydraulic coverage capacities up to 1600 m³/h, nearly four times existing IC models
- Both closed and semi-open impeller designs options
 - The semi-open design includes a replaceable wear plate design which is new to the brand’s IC process portfolio

The innovation comes in response to customers’ need for more flexibility in pump offerings across industrial applications like oil and gas, chemical processing, and water/wastewater management. Accurate pump sizing minimizes wear, reduces maintenance requirements, and extends equipment life, ensuring reliable operation even in the most challenging conditions.

About Goulds Pumps

Goulds Pumps, an ITT company, is backed by more than 175 years of engineering expertise in the design and manufacture of pump technologies worldwide. As one of the industry's most recognized brands, Goulds Pumps offers a comprehensive portfolio of centrifugal and specialty pump solutions engineered for reliability, efficiency, and long service life in demanding environments. Through advanced hydraulic design, application expertise, and aftermarket support services, Goulds Pumps helps customers improve operational performance, reliability, and uptime. For more information, visit <http://www.gouldspumps.com>.

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the transportation, industrial, nutrition and health and energy markets. The company operates through three value centers: Flow Technologies, Motion Technologies and Connect & Control Technologies. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. ITT is headquartered in Stamford, Connecticut, with employees in more than 40 countries and sales in approximately 125 countries. For more information, visit www.itt.com.
